| 08021020094     | 080    | KEW   |

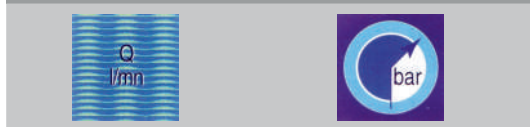

### HOW TO CHOOSE THE SUITABLE NOZZLE?

1. The basis for the selection of the right nozzle is the knowledge of the washer's flow (l / h) and the working pressure (bar) e.g. 15l/min (900 l/h) - 150 bar
2. In the first line (pressure in bar) please go to column 150
3. Follow column 150 down to find l/min: take 15,2, (that is the nearest to 15 l/min)
4. Turn left in line 15,2 until the first column and stop at nozzle type
5. The size you need is 055

### TABELA DOBORU DYSZY

| Nozzle | Pressure (bar) |      |      |      |      |      |      |      |      |      |      |       |       |       |       |       |       |       |       |       |       |       |

Important for excellent high pressure cleaning is the impact of the spray jet which is made up of 4 features:

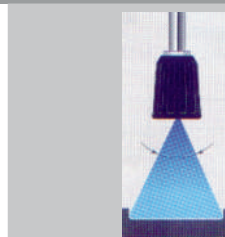

water flow

water pressure

spray angle

spray distance

low impact

=

high surface efficiency

high impact

=

small surface efficiency

**PLASTIC FILTER**

| Code       | Inlet | Type          | Colour |
|------------|-------|---------------|--------|
| 0102401601 | 6 mm  | with valve    | blue   |
| 0102401602 | 6 mm  | without valve | black  |

**WATER FILTER**

| 55 l/min - 10 bar - 40 °C |                  |        |                          |
|---------------------------|------------------|--------|--------------------------|
| Code                      | Inlet            | Outlet | Strained (micron / mesh) |
| 0103401000                | 1/2" F           | 1/2" F | 297 / 50                 |
| 0103401003                | 1/2" F           | 1/2" F | 177 / 80                 |

| 0702106693 | 150 - 2,30 |
| 0702106692 | 200 - 2,65 |

**HOW TO CHOOSE THE CORRECT INJECTOR SIZE ST 160 AND ST 75?**

1. Determine the size of the water nozzle in the HP cleaner for which we want to select the injector (table p. 52),
2. In the first column we find the previously selected nozzle size,
3. In the following columns of this row we have the remaining data that are needed for proper work of the injector.

| Nozzle size HP cleaner | Nozzle size Injector ST 160 | Recommended hose diameter | Nozzle size Injector ST 75 |
|------------------------|-----------------------------|---------------------------|----------------------------|
| 030                    | 1,20                        | DN 8                      | 060                        |
| 035                    | 1,30                        | DN 8                      | 060                        |
| 040                    | 1,40                        | DN 8                      | 075                        |
| 045                    | 1,50                        | DN 8                      | 080                        |
| 055                    | 1,60                        | DN 8                      | 100                        |
| 060                    | 1,70                        | DN 8                      | 100                        |
| 070                    | 1,80                        | DN 8                      | 130                        |

Drain: It has a small diameter and good elasticity, ideal as a hose for clearing sewer pipes  
 Hobby: ideal hose for hobby high pressure washer  
 Standard: elastic thermoplastic hose resistant to atmospheric and chemical agents  
 Applications: car wash, pressure washers, etc.  
 CarWash Special: special hose suitable for car wash. The inner side of the hose resistant to chemical factors  
 Special Sea: external coating is resistant to salt, sea water and chlorine. Ideal for cleaning swimming pools.  
 Special Food: thermoplastic hose for food industry
